

Nexa CM-500W

Bluetooth Barcode Scanner

Overview

Designed with mobility in mind, the CM-500W is compact and extremely portable. It's also simple to pair with your iPad, iPhone or iPod Touch, and can work with Android devices as well.

An example of how this scanner is specifically designed for use with iPads, iPhones and the iPod Touch, is that connecting many other Bluetooth barcode scanners will result in hiding the on screen keyboard, but the CM-500W allows you to display or hide the on screen keyboard at any time by pressing a button on the scanner.

The CM-500W is also equally usable as a batch mode barcode collector, so it can scan and store barcode in memory to upload to a PC via a cable later, or with the included cable you can plug it into a PC and use it for tethered scanning like you would with a traditional scanner.
