

The Next-Generation Monitor Arm

Offering all the benefits of a traditional dynamic monitor arm, with none of the shortcomings, the M2 redefines high-performance monitor arms.

Current-generation monitor arms utilise a bulky, failure-prone gas cylinder to support the weight of the monitor. The M2 instead uses an innovative mechanical spring to achieve exceptional performance and durability in a lightweight, ultra-thin design.

The Benefits of Mechanical Spring Technology

Design

The M2 is thinner, lighter and easier to manoeuvre than any currentgeneration monitor arm, and its sleek aesthetic complements the thin profiles of today's flat panel monitors.

Durability

With no gas cylinder and fewer parts than current-generation arms, less can go wrong with the M2 over time. As a result, it's backed by an 10 year warranty.

Performance

Designed to support 95% of the monitors in use today and offering effortless adjustment of both height and depth, the M2 will accommodate virtually every application for single monitors.

A New Level of Sustainability

For all its advancements, the M2's most notable achievement is that it treads lightly where the environment is concerned.

- Fewer parts mean fewer manufacturing processes
- Lighter weight means less material to source, process, dispose of, and ship
- Slim profile enables less wasteful packaging
- Durable design means it won't need to be replaced for a very, very long time
- No gas cylinders, which are difficult to recycle
- 52% recycled content and 99% recyclable
- Contributes to valuable LEED-CI, -NC and -EB points

Specifications

- Supports 95% of monitors in use today, up to 9kg (20 lbs.)
- Interchangeable mounting options attach to a variety of work surfaces
- Integrated cable management hides cables within the arm
- Removable 180° stop protects walls and panels
- Arm reach: 510mm (20")
- Height adjustment range: 255mm (10")
- Weight: 2.6kg (5.7 lbs.)
- Finish options: Polished Aluminium with White accents, Silver with Grey accents or Black with Black accents
- Made primarily of recycled aluminium
- 52% recycled and 99% recyclable content
- May contribute to a number of LEED-CI, -NC and -EB credits
- 10 year warranty
