

Disinfectant-Ready Housings

Healthcare Solution

Ensuring patient safety should be the primary concern of healthcare professionals. Honeywell is the first company in the automatic identification and data collection (AIDC) industry to introduce disinfectant-ready housings, a healthcare solution designed specifically to address this concern.

Excellent at resisting the harmful effects of harsh cleaning agents used commonly in healthcare environments, Honeywell now offers products that are built to withstand frequent exposure to any of our recommended cleaning solutions.

Data collection hardware is traditionally made of amorphous plastics, such as PC/ABS. These plastics become susceptible to cracking after repeated exposure to harsh chemicals. Cracks can lead to hardware malfunction and more serious consequences, such as the corrosion of electronic circuitry and electrical fires.

Healthcare professionals that use traditional data collection hardware often place their hardware in plastic bags to reduce the likelihood of contamination. This practice results in poor scanning performance.

Disinfectant-ready housings allow healthcare professionals to execute the 5 rights of patient safety, while minimizing the risk of spreading infectious diseases.

Several Honeywell solutions including the Xenon™ 1900, the Xenon™ 1902, the Dolphin® 9900hc, and the Dolphin® 9700hc are now available with disinfectant-ready housings.

Protect your patients and your hardware investment by choosing Honeywell solutions with disinfectant-ready housings.

Products available with white disinfectant-ready housings	
	Xenon™ 1900
	Xenon™ 1902
	Dolphin® 9900hc mobile computer
	Dolphin® 9700hc mobile computer

Recommended Cleaning Solutions

- Sani-Cloth® HB
